## **Preface**

The Half Hollow Hills Middle School Course Offering Book has been prepared so that students and parents may familiarize themselves with course offerings, and to provide an outline for planning student's academic programs. Our guidance counselors, teachers and administrators are ready to help in the process of course selection. Additionally, the department course descriptions are followed by a flow chart to provide students direction in planning for the future.

### **Notice of Non-discrimination**

The Half Hollow Hills Central School District does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities and provides equal access to the Boy Scouts and other designated youth groups. The following person has been designated to handle inquiries regarding the non-discrimination policies:

Dr. Patrick Harrigan  
Deputy Superintendent

Half Hollow Hills Central School District  
Fran Greenspan Administration Center  
525 Half Hollow Road

There is an emphasis placed on developing students' problem solving strategies and selected topics of the middle level sequence are taught to a mastery level. The sixth grade areas of study include, number and operations, measurement, algebra, geometry, probability and statistics. All sixth grade students will take the N.Y. State sixth grade mathematics assessment in the spring.</p>

# Physical Education

Physical Education is a New York State required course. Successful completion of 40 weeks (alternating days) during grades 6, 7, and 8 of physical education is necessary in order to graduate from the middle school.

Education Law, Section 803 and 3204 and Regulations of the Commissioner of Education, Section 135.4 mandate physical education for all pupils in New York State.

The physical education experience is designed to facilitate and include a wide variety of sport and physical activities for all Half Hollow Hills Middle School students. The developmentally diverse middle school student will experience shorter units of instruction with an emphasis on proper skill technique and through practice begin using these skills in a variety of lead up games that ensure success. Students will also begin to use tactical strategies in game play. To accomplish this objective, the benefits of sport and physical activity are taught throughout 8 different categories. These activities have been designed to provide a maximum opportunity for all students and meet the New York State Learning Standards listed below:

**Learning Standard 1A:** Students will perform basic motor and manipulative skills. They will attain competency in a variety of physical activities and proficiency in a few select complex motor and sports activities.

**Learning Standard 1B:** Students will design personal fitness programs to improve aerobic endurance, flexibility, muscular strength, endurance, and body composition.

.  
. .  
.

**Learning Standard 2A:** Students will demonstrate responsible personal and social behavior while engaged in physical activity.

**Learning Standard 2B:** Students will understand that physical activity provides the opportunity for enjoyment, challenge, self-expression, and communication.

**Learning Standard 2C:** Students will be able to identify safety hazards and react effectively to ensure a safe and positive experience for all participants.

.  
.

**Learning Standard 3A:** Students will be aware of and able to access opportunities available to them within their community to engage in physical activity.

**Learning Standard 3B:** Students will be informed consumers and able to evaluate facilities and programs.

**Learning Standard 3C:** Students will be aware of some career options in the field of physical education and sports

<p><b>AP Human Geography</b> Grades: 9, 10, 11, &amp; 12 with teacher and/or departmental recommendation Course Length: 40 weeks</p>	<p>This college level course introduces students to the importance of spatial organization, including the location of places, people and events, and the connections among places and landscape and the understanding of human life on Earth. While history poses “When and why?” human geography asks “Where and Why?” Students will explore population and the ways in which the human population is organized geographically, cultural patterns and processes and the way geographers assess cultural groups as defined by language, religion, race, ethnicity, and gender, the political organization of space, industrial and economic development as it relates to space utilization, and urban land use, as well as other provocative topics. Several projects will be assigned. <b>This is a college level course and students will be expected to take the AP Human Geography exam. A summer assignment will be required.</b></p>
